

March 31, 2021

ProPricer™ Customers,

I am pleased to announce that the next release of ProPricer's companion products is here. Please review the following release notes to see the new products, features, and enhancements we've released and how they can optimize your ProPricer operations.

If you have any questions or issues, please do not hesitate to contact our technical support team at (951) 693-0440 or support@propricer.com.

I am also available to discuss any general feedback you have about ProPricer's companion products. Enhancements suggested by our users help us to serve you better as a software provider.

Thank you for your continued support of the ProPricer line of products,

Aaron Hale

ProPricer Companion Products

To find your current version: open the ProPricer product and go to **Help > About**.

To view the latest plans for upcoming releases, go to the [ProPricer Bulletin](#).

Release Date: March 31, 2021

Version: 3.4.102.2

Release: R4

Current database version: 155

Model version: 9.4.2.0

Current package/Stored procedure version: 155

.NET 4.6.1 is required

Important notes:

New release schedule

Beginning in 2022, ProPricer companion products are released at the end of each quarter. These companion products will be compatible with the latest version of ProPricer.

Upgrading ProPricer companion products

If you plan to upgrade a ProPricer companion product that is version 3.3.108 or older, it must be uninstalled before installing the latest version. You will experience issues upgrading Connect for Excel, Connect for Word, GSA Travel Import, and Management Console when version 3.3.108 or older is still installed on your computer.

Support ended for ProPricer 9.2

Support for ProPricer 9.2 and its corresponding versions of companion products ended with the release of ProPricer 9.4.100 on May 6, 2021. We encourage all ProPricer customers to upgrade to the latest build, especially those using 9.2. Customers who are using 9.2 but are in the process of upgrading will still have access to 9.2 support.

New products

Active Directory User Sync

The Active Directory User Sync allows you to sync users and groups in Microsoft Windows Active Directory with ProPricer users and roles. When a user or group is created or changed in Active Directory, the users and roles in ProPricer are automatically updated.

Database Optimization Tool

The Database Optimization Tool removes resources and resource fields that are not used in the rate tables or proposals of a ProPricer database. By removing a significant amount of unused resources and resource fields from a ProPricer database, the performance of ProPricer is improved. The tool also creates ProPricer archive files containing any deleted data in case you'll need it again.

Connect for Word & Connect for Excel

Enhancements

Manage References improvements

You can now print or export the Manage References grid and delete all the selected grid data at once.

Task Data tab improvements

The Task Data tab can now be filtered by resource, resource fields, and resource class. Also, Direct Cost can now be selected.

Database Integration Tool

Enhancements

Run an import or export from within the application

On the Main ribbon, a new Run button allows you to process an import or export. This means users no longer need to run command line parameters to process an import or export.

Generate database tables

A new feature called Generate Database Tables allows you to create empty MSSQL or Oracle database tables that are formatted for ProPricer data.

Assembly/Part material fields available for imports and exports

Material fields in the Assembly Library can now be selected in a data mapping for import or export.

Double-click a data mapping file to open the application

The Database Integration Manager application can now be opened by double-clicking a data mapping file in your File Explorer.

Performance improvements

The processing speed for imports and exports has been improved.

Fixes

- Data element tabs now show the correct name when they are opened individually or from the parent element.
- A typo in the log file has been corrected.
- When a database connection fails, an error message now provides details explaining why it failed.

GSA Travel Import Tool

Exciting new GSA Travel Import features and enhancements will be coming in the 2nd quarter of 2022, including the ability to import timephased travel rates and international travel rates.

Management Console

Enhancements

Summary View

View summarized data for all the resource estimates in all the selected proposals. This data can be grouped, filtered, and sorted to display exactly what you need to see.

Advanced Export improvements

When the Advanced Export window is opened, the last export type that was used is automatically selected.

Clear all filters on the Proposal Selection tab

A button has been added to the Proposal Selection tab that allows you to clear all the filters that have been applied to the grid.

Fixes

- The Pivot Grid features now work correctly.
- When exporting proposal data, the start date and end date are now correct.
- Data can now be shown for hundreds of selected proposals.
- When a Print Preview is opened for a grid, the data now appears with the correct font size.

Import/Export Tool

Fixes

- Proposal CERs now import from ProPricer correctly.
- When vendor information is imported into Excel, the country codes are now correct.
- On the Travel Rate Expenses sheet, the Expense Currency now imports correctly.
- On the Travel Rate Expenses sheet, the Weekly Rate, Monthly Rate, and Expense Currency column headers are now shown correctly.

Upcoming releases

The features that will be included in upcoming releases may change. To view the latest plans for upcoming releases, go to the [ProPricer Bulletin](#).
