January 27, 2023

ProPricer™ Customers,

I am pleased to announce that the next release of ProPricer's companion products is here. Please review the following release notes to see the new features and enhancements we've released and how they can optimize your ProPricer operations.

If you have any questions or issues, please do not hesitate to contact our technical support team at 800-507-9980 or support@propricer.com.

I am also available to discuss any general feedback you have about ProPricer's companion products. Enhancements suggested by our users help us to serve you better as a software provider.

Thank you for your continued support of the ProPricer line of products,

Aaron Hale

ProPricer Companion Products

To find your current version: open the ProPricer product and go to **Help** > **About**.

To view the latest plans for upcoming releases, go to the ProPricer Bulletin.

Release Date: January 27, 2023

Version: 3.5.100.1

Release: R1

Current database version: 161

Model version: 9.5.0.0

Current package/Stored procedure version: 161

.NET 4.8 is required

Important notes:

Switch to .NET Core application model

In version 3.5.100, the ProPricer companion product application model has been upgraded to .NET 6. In previous versions, the application model had to be installed before the applications could be installed. In version 3.5.100, the .NET Core 6 model is automatically installed along with the applications. The .NET Core 6 model also provides better integration with our current and future web-based products and allows our developers to utilize new tools that were not previously available.

Upgrading ProPricer companion products

If you plan to upgrade a ProPricer companion product that is version 3.3.108 or older, it must be uninstalled before installing the latest version. You will experience issues upgrading Connect for Excel, Connect for Word, GSA Travel Import, and Management Console when version 3.3.108 or older is still installed on your computer.

Import/Export Tool

Fixes

- The installation file now works with Windows 11.

- The names of the import and export dialog boxes in the user interface have been fixed.

- When a locked proposal is selected in the import or export dialog boxes, then an unlocked proposal is selected, the dialog box refreshes automatically.

- Rate card data can be exported successfully again.

- Summary fields from unlocked proposals can now be imported into locked proposals.

- When validating data, errors are now highlighted correctly.

- Travel rate overrides now export correctly.

Maintained products

We will continue to maintain and develop the following products in 2023:

- Database Integration Tool

- Active Directory User Sync

- Management Console

- GSA Travel Import Tool

- Connect for Word & Connect for Excel

- Database Optimization Tool
